VIRTUAL INTEGRATED PATIENT RECORD (VIPR)

CREATING CARE-CONNECTED COMMUNITIES

Beverly McKee, RN - GLHC
Solution Specialist

Steve Spieker, LPC - GLHC
Manager, Solution Support

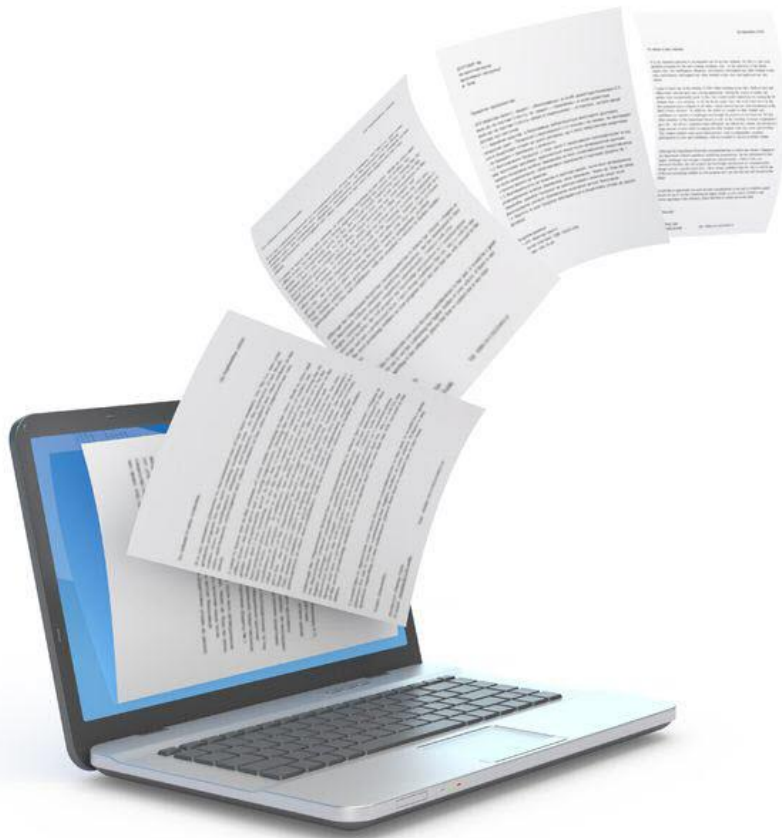

Have you ever
felt like this?

When you need patient information
NOW!

**EMERGENCY**

Virtual Integrated Patient Record (VIPR)

Since April 2012
77+ Data Sources
7+ Million Patients

VIPR includes:

ADT

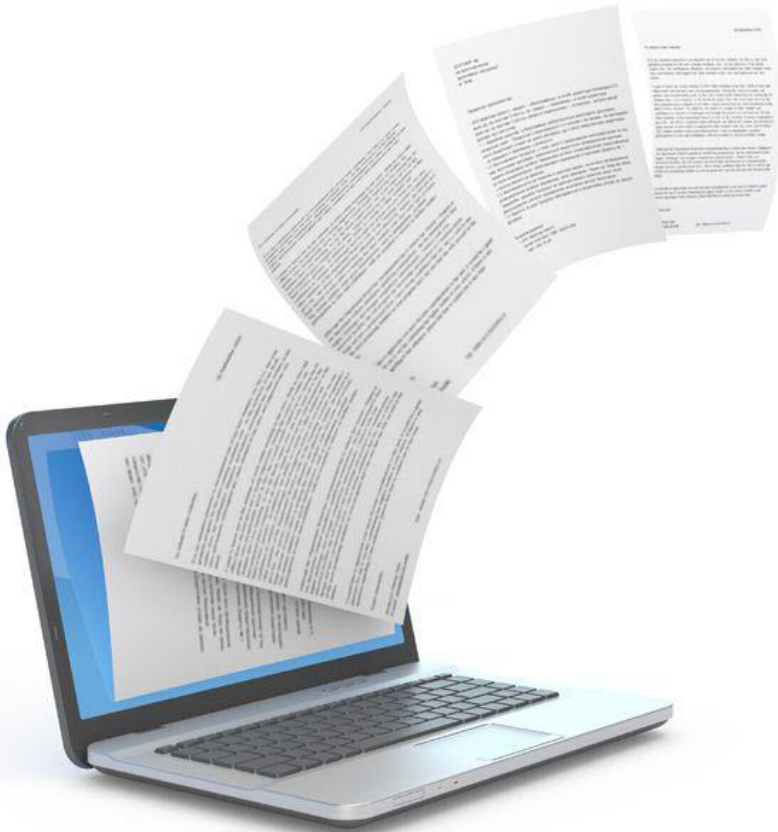

Lab Results

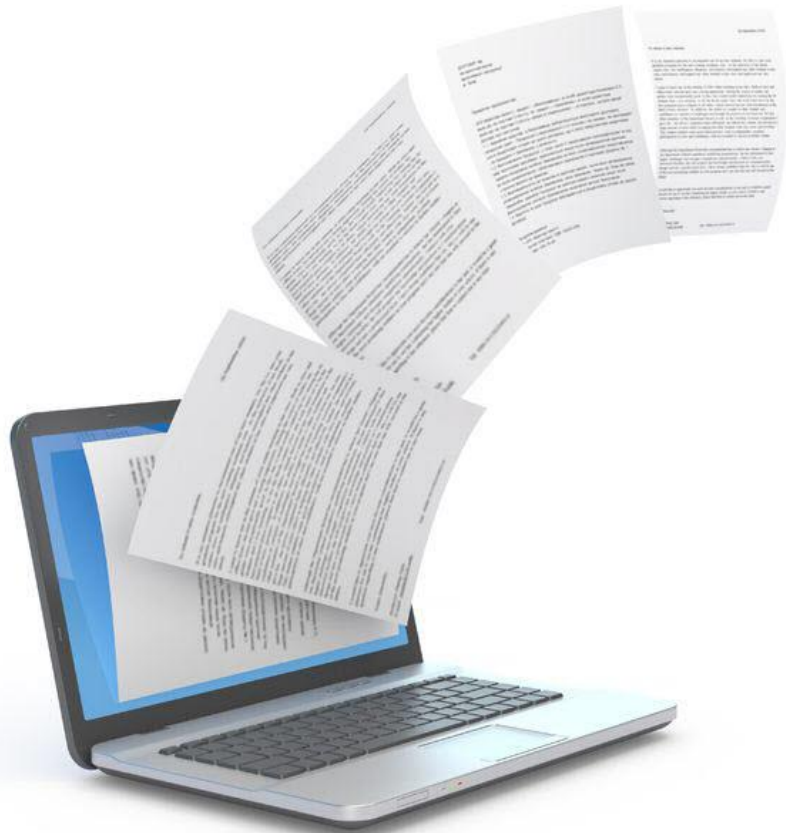

Radiology Results

Transcribed Documents

CCDs

Link to Radiology Images

VIPR also includes:

Advance Care Directives
Action Plans
Care Plans
Antepartum Records

Since September 2013
9,000+ Documents

Using VIPR at St. Mary's ED

“Using VIPR to access patient's medical records from other facilities has become an essential tool that we use at Mercy Health St. Mary's to **ensure safety and quality patient care**. VIPR provides **lifesaving information** because knowing the results of previous medical testing, or opinions from other physicians, plays a **crucial role in diagnosing and treating our clients**. Patients have come to expect that physicians across health systems have access to their records. It is particularly important in the emergency department where decisions need to be made quickly , **24 hours a day, 7 days a week.**”

Daniel Roper, MD, Medical Director, Emergency Department,
Mercy Health Saint Mary's
